

2008 EDGE

The Ford Edge crossover continues to energize the Ford brand in the hottest vehicle segment in the United States. Ford's five-passenger crossover distinguishes itself with bold, American design, a flexible interior, dynamic driving character and a host of innovative features.

The Edge delivers spirited performance, fuel efficiency and a smooth, quiet ride from its class-exclusive 265-horsepower V-6 engine and 6-speed automatic transmission. Edge also delivers on safety, with a host of standard safety features including Ford's exclusive AdvanceTrac® with RSC®. Edge boasts a "Top Safety Pick" from the Insurance Institute for Highway Safety and achieved two five-star crash-test ratings from the National Highway Traffic Safety Administration.

Edge's well-rounded, modern performance extends to impressive refinement, enhancing the driving experience. In fact, testing has proven that the Edge's interior is quieter than the Lexus RX350.

Edge is available with front- or all-wheel drive in SE, SEL and Limited trims.

Edge offers even more choices for 2008 with the addition of the Limited Series, a new Interior Appearance Package that includes leather-trimmed seats with premium red seating surfaces and contrast stitching, a new 18-inch wheel option and new class-exclusive 20-inch wheels.

INNOVATION: CLASS-EXCLUSIVE PANORAMIC VISTA ROOF™

Edge's available panoramic Vista Roof™ opens up a whole world of possibilities. The large glass moon roof provides a grand view of the sky above and can open for a sense of freedom that accentuates Edge's sporting nature. The roof features a large forward panel that offers tilt and slide opening and a fixed rear glass panel. A one-touch-open switch provides open-air touring. Close the forward roof, and the enormous skylights allow natural light to flood the cabin, while protecting the cabin from the elements. When preferred, the twin power-operated cloth shades can be closed simultaneously to block glare.
